

Just don't react to network outages...

Prevent them before they happen

Eliminate the guess work and finger pointing

MONITORING & ALERT SERVICES

- * Network outages can easily cost thousands in lost business or customer support costs.
- * Reduce your risk of catastrophic network outages for one, low monthly fee.

An ounce of prevention, a pound of cure...

Network managers agree that most network outages can be prevented if given enough heads-up. Monitoring & Alert examines your network devices and provides automated alerts, allowing COVERSE to identify and isolate potential troubled areas of your infrastructure before they can cripple your business. Cost effective for small businesses!

Services included

- * Proactive Monitoring & Reporting
- * Support for major infrastructure components
- * Custom thresholds and triggers
- * Automatic alerts and notifications via email
- * Monitoring is tailored to client needs & budget

\$ **99** / month

As low as \$99.00 per month per server depending on the size of your network and options selected.
